

The Indiana State Department of Health, in partnership with the Cribs for Kids National Infant Safe Sleep Initiative, implements a statewide program that provides education and infant survival kits to infant caregivers and families. The survival kits contain one infant portable crib, fitted sheet with imprinted safe sleep messaging, a wearable blanket, a pacifier, and safe sleep recommendations for those in need and at risk. Hoosier Uplands implements the program in the agency's 5 primary counties. Please contact Alyssa Prince if you are in need of a safe place for your child to sleep at 812-849-4447 or by email: aprince@hoosieruplands.org.
